

**** Memory Slideshow on DVD ****

If you have not seen one,

Ask someone who has! Words cannot explain how Video adds life to a series of your still pictures. There is the luminance of the TV screen, the continuity of the images dissolving one into the next and the mood furnished by the music. Since the pictures are of the people you love, you add the tears and the laughter. Order your Memory Video, and when it plays, have the Kleenex's handy because it will bring your special occasion back to life!

*Creative edited photo's transitioning between dissolve, pan, spin and other special effects

*An opening animated title screen with the text of your choice.

Add a music track, using the music you supply or I can choose.

*I can include a closing text/graphic screens, expressing the sentiments that you specify
